

How does our research benefit our students?

INTERNATIONAL RESEARCH DAYS

Waldorf High Schools

Searching for your inner self by connecting with others

July 15 - 19, 2019 • Buenos Aires

How do we present the world to our students: fragmented or integrated?

How do our students develop their individuality in a globalized world?

How do today's youth live in an intercultural environment?

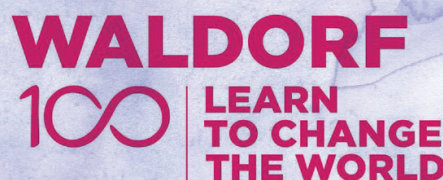

Our challenge is to share research processes, working on them before
our encounter interdisciplinarily.

We invite all colleagues from Waldorf High Schools
throughout the world to join this initiative.

Developing the inner path of the teacher will be a fundamental part of this gathering,
in a pursuit that we will take on in small groups, each dealing with a different approach.

All activities will be carried out in Spanish and English.

Come, participate and share our transcendental ideal.
